SECRETARY

~  
ART SCHEURER  
SAFETY COORDINATOR  
& FIELD MARSHALL

~  
BRET MARTIN  
FERNANDO MESA  
AMA INTRO PILOT  
INSTRUCTORS

## From Charles Montford:

*"After a foggy start, Saturday morning, July 24, turned into another beautiful flying day for the One Wing Low Squadron at the Williston Owl's Flying Field.*

*Bert was flying his Multiplex Rockstar biplane. It has a wingspan of 41 inches, length 40.5 inches, weight 18.4 oz. It's a beautiful pattern or aerobatic biplane intended for intermediate to advanced RC fliers. Bert flew it beautifully.*

*As is the case with almost all models I really like, this one is also discontinued."*

## Flight Feathers

### Glue test from Bert Prieus:

*“Met George last saturday and he was talking about his biplane he broke in two during his second flight. When I proposed to have it fixed he gave me a tube of glue. Before using it I ran a test of 3 different glues on a piece of EPO. After following the instructions - cure time etc... I tested the bonding and guess what. I could not pull apart the parts glued with Shoe Goo. The others were not that hard. Am attaching some pictures - self explanatory.”*

### AND THE RESULTS:
